11b Mansfield Road, OX1 3SZ

#### DEMONSTRATION

14:30-15:30	Intro to Practicals & Open Lab Tour
-------------	--

#### Biology at Oxford

This talk is all about the Biology course. Hear about the exciting course modules across the years, and the labs, classes, and field trips to expect!

#### Admissions, Careers, and Q&A Panel

Why study biology? There are a vast range of potential careers; join this talk to hear more about where the subject can take you. We will also cover the admissions process and have a question panel to answer anything about admissions, applications, and the course.

#### Demonstration Interview

There are lots of myths about interviews at Oxford, but really they're just conversations about a chosen subject. Join our mock interview to see what an interview is like, what kind of questions students can expect, and ask questions about the interview.

#### Meet the Students

An opportunity to meet with current Biology students and hear about their experience on the course! This casual meet & greet session is a chance to hear what makes this course so interesting, and what it's like to be a student of Biology at Oxford.

#### Meet the Academics & Students

Same as meet the students, but with the academics as well! We will have college tutors at these meet and greets, who are there to help explain what students can expect from studying Biology at a college in Oxford.

#### Open Lab and Meet & Greet

Pop along to our teaching lab to see the facilities and what kind of lab practicals students might undertake in their first year! Students and academics will also be around to answer questions.
